

# National SIGN

The National Health and Care  
Strategic Information Governance Network  
Representing frontline  
Information Governance Professionals

**The National SIGN brings together the Chairs of a network of independent, regional, and sectoral Information Governance groups from across England.**

The individual groups provide Information Governance and Data Protection professionals working in health and care access to peer support, networking and best practice advice and guidance. Many of the groups have been in existence for many years. Issues identified locally are frequently escalated to the National SIGN, which works with central agencies, providing feedback on the impact of current issues and helping to influence the structure of their formal advice and guidance.

## **Cheshire & Merseyside**
